Old Relocation relatives info endpoint

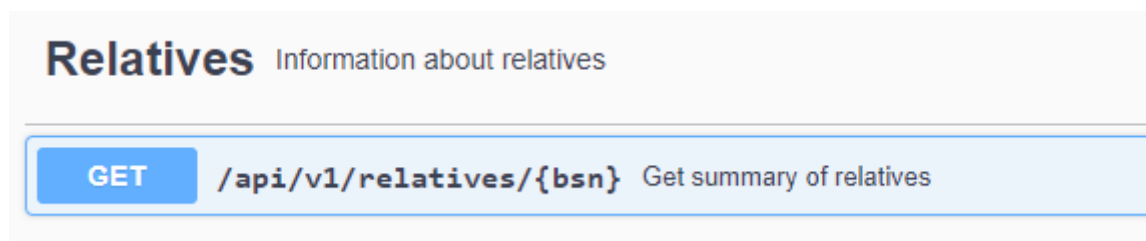

This is deprecated, but still usable

The image shows a snippet from a Swagger UI. At the top, the heading "Relocations" is followed by the description "Generic actions related to relocations". Below this, there is a table of endpoints. The first entry is a "GET" method for the endpoint `/api/v1/relocations/info/relatives/{bsn}`, with the description "Get summary of relatives". The endpoint name and description are highlighted in a light grey box.

New generic relatives information endpoint

The image shows a snippet from a Swagger UI. At the top, the heading "Relatives" is followed by the description "Information about relatives". Below this, there is a table of endpoints. The first entry is a "GET" method for the endpoint `/api/v1/relatives/{bsn}`, with the description "Get summary of relatives". The endpoint name and description are highlighted in a light blue box.

| PERSON_RECORD_IS_SUSPENDED | Persoonslijst is opgeschort |
| PERSON_HAS_CURATOR | Persoon staat onder curatele |
| PERSON_HAS_CONFIDENTIALITY * | Persoon heeft een indicatie geheimhouding |

* I added ‘_CASE’ to emphasize that is about a case, not an indication on the ‘personslist’.

The dutch translations are not used by us. Feel free to change them.

Response

I added age in the response because it is often used to determine the obstructions to a service.
